- Entrepreneurial ownership
- Customer understanding
- Fast prototyping
- Creative problem-solving

STANISLAV KOSYTSKYY

APPLIED AI | PRODUCT BUILDER | ENTREPRENEUR

■ PROFILE

Finland-based product-minded builder with ICT studies focused on software and game development and hands-on responsibility for a small service business. I turn real workflows into practical software and AI-assisted systems, with human review where it matters. My current technical direction is Python, APIs, Git/CI, LLM applications and automation.

ENGINEERING DIRECTION

Python | REST APIs | Git / GitHub Actions | React / Vite | LLM apps

■ SELECTED WORK

LIVE OPERATIONS

Muuttobotti / Autochemix Oy

Customer acquisition, Finnish offers, pricing, logistics, marketing, website support and daily service delivery.

ACTIVE

AI workflow library

Reusable prompts, templates, inputs and review steps for communication, offers, documents and planning.

BUILDING

Python business automation

Quote generation, customer and financial tracking, data organization and future API-based integrations.

PORTFOLIO

React + CI delivery

Interactive multilingual portfolio built with React/Vite and GitHub Actions for repeatable deployment checks.

■ EXPERIENCE

Autochemix Oy / Muuttobotti - Entrepreneur & operations

2024 - PRESENT

Business planning began in 2024; Autochemix Oy was officially founded in May 2025. Hands-on responsibility across customers, offers, pricing, logistics, company administration, documentation and operational problem-solving.

■ EDUCATION

Taitotalo - ICT studies

2020 - 2022

Focus on software development and software for games, including practical development, project work and digital production.
